#### BLUE SIGN CRIPPLED FOR LIFE

in Cat on Fore Post in a Seri With Boy Wilker and

New Your, Sept 1.—The threatening weather today had no effect upon the enthusiastic mimiers of the light harness houses and fully 3,000 people were present at Fleetwood park when the horses for the first race on the program were united. This event was the post-puned free for all pace and the cracka-jacks were coming against each other. The horses went away on very even terms. When they reached the lower turn. Elize Sign, Roy Wilkes and Vitelle got into a scrimmage in which Blue Sign was cut down very badly and crippled for life on the forward foot. In the meantime Build Doble and Kally were fighting it out with Manager and Flying Jib and at the last half mile Doble tried to go through ment the rail when Kelly drew in on him thinking he wound pull his horse up, instead Doble ran the pacer up to Kelly's sulky and deliberately slashed him with him whip, causing in ugly wound on Kelly's face. The later then opened up the space and Doble tried to get in, but Kally held him up to the stretch when Doble used his whip to good advantage on Manager and indeed him a winner by half a length. The behavior of the two drivers did not exactly satisfy the judges so they decisled to fine Doble filth and Kelly had to be satisfied with fifth place in the factest time ever made for a half unite on the Fleetwood track.

The Hartford pures for 3-year-olds, pures \$10,000, only brought two horses to the pool, and he proved the best horse for he carried off first money in an extremely easy manner.

The patented head, found only on this machine, is a triumph of American ingenuity, and makes the wood and steel conjunction perfectly strong and firm. For these parts only the best imported weldless steel tubing is used. The rubber cushion tire is secured to the wheel rim in such a manner that it is guaranteed not to become detached or loose. The wheel bearings are a brass collar so delicately adjusted to the steel shaft as to reduce the friction to a minimum, and render the usual ball bearings superfluous. WORLD'S PAIR FRUIT.

William Rowe of Saranac Submits Some Suggestions.

Sanarac, Mich., Sept. L.—Ecrem or The Hanara. Duan Sur—I see by your paper of August 31 that the Hon. I. M. Western and hilled J. Brown are deter-ement that the Michigan fruit exhibit shall cast or reflection on the state. While those gentlemen are deserving credit for their public spirit in this mat-ter, so an old fruit govern I do not ap-pears of their method for precuring the schilit.

2. Fruit selected from the market hosket will stone braises and imperior, 2. A large per cent of choice rarieties AN ATTRACTIVE CHILD.

Let me suggest the method pursued by some of the old fruit
exhibiter in our State Hosticultural
socious a few years ago. We would
start out with house and wagon, also a
long pole, with a picking bug attached
to the pole. We would go through the
orchards and very carefully select the
best specimens, placing such variety in
a paper sack, with the names on the
suck. A few days work by two good
fruit men in each of our best fruit counties, men who knew where to find the
different varieties, would bring forward
a collection of fruit for the Michigan
subject at Chinago that every citizen of
the state would be proud of.

The writer would suggest a few names
of men who have he experience in
tate collections of fruit:

For Van Buren county, A. Ginlier J. The Unfortunate Occurrence Of Her Life.

their children.

But here is a story told by one mother which, while it may awake echoes of sadness in the minds and hearts of some parents, will be to others a message fraught with hope and joy.

The child whose short history of mingled sorrow and gladness is here given is the daughter of the well known Mrs.

J. Learmouth, who resides at 776 Broadway, South Boston, Mass.

"At ten years of are," said Mrs. Lear-

ities.

If. Dale Adams of Galgeburg can suggest good men for the southern counties.

Let the collections embrace all classes of Michigan fruit, selected in a proper manner, and the state can be brought to the front with her fruit exhibit at the world's fair.

Yours in the interest of pomology.

An all-steel machine made heavy enough to withstand the hard usage to which it is subjected is so heavy as to be a serious drawback to its universal use by young people. Again, the steel machines, without the greatest care being taken to keep them clean and dry, soon become rusted and therefore easily broken; whereas a machine made of steel and wood will not suffer from exposure any more than a carriage.

A hickory framed and wheeled safety is not only more durable and lighter, but it is much more clastic, and the loss of the vibration and rigidity found in the all-steel machines makes these steal and hickory machines more comfortable for riding than any other machine made. The cushioned seat is suspended on our patented spiral spring, adjustable to varying heights and weights, and this, in combination with the hickory frame, makes the casiest possible riding michine. The sprocket wheel chain is perfectly adjusted, so as to utilize the full amount of power expended, and is made to the case at the case of the process. METROPOLITAN Business College.
